

RAMÓN ALFREDO FERNANDEZ LAPAIX

PROFILE:

- 1+ year as a Full-Stack developer, 7 months in freelance projects in Aythen and since March 2022 in personal projects.

PROFESSIONAL EXPERIENCE:

Aythen, Spain	Remote	Full-Stack Developer	Since: 11/01/2023	To: 11/07/2023
----------------------	---------------	-----------------------------	------------------------------------	---------------------------------

- First Aythen project main Aythen page creation and reuse of components, pages, custom hooks and development of various functionalities with a team of approximately 2-10 people.

Functional
Experience:

I Played a crucial role in the development of key components, including modals, forms, pages, and custom hooks. Additionally, I actively contributed to enhancing the design of certain components. I played a pivotal role in addressing and resolving various design issues across different pages. Simultaneously, I was involved in i18n integration, specifically in creating the dropdown menu and assisting with its translations.

Furthermore, I seamlessly integrated and developed various pages, such as login pages, and implemented endpoints for essential functions like sending emails. I also managed data consumption in the front-end, maintaining it in the global state of REDUX. Additionally, I played a significant role in enhancing functionalities within the web page editor.

In the realm of database development, I contributed to the creation of tables in Postgres. Leveraging express and REST, I crafted endpoints and facilitated their integration with the front end on pages requiring interaction with this information.

Tools:

HTML, CSS, Javascript, Typescript, React, Express, postgres, ReduxToolkit
