

RAMÓN ALFREDO FERNANDEZ LAPAIX

PROFILE:

- 1 year as a Full-Stack developer, 7 months in freelance projects in Aythen and 4 months in personal projects.

PROFESSIONAL EXPERIENCE:

Aythen, Spain	Remote	Full-Stack Developer	Since: 11/01/2023	To: 21/04/2023
---------------	--------	----------------------	----------------------	-------------------

- First Aythen project main page creation and reuse of components and pages using Vulk templates and development of various functionalities with a team of approximately 5 people.

Functional Experience: I worked on component development, i18n integration, creating the dropdown menu and helping with its translations. I integrated and developed various pages such as login pages among others. I also helped to change and fix various design problems on different pages and integrated a redirection to the company chat. I contributed to the development of database tables in PostgreSQL, I also used Express along with REST to create endpoints and consume them in the front-end on the pages that would have interaction with this information.

Tools: HTML, CSS, JavaScript, Vue.js, PostgreSQL, Express

Aythen, Spain	Remote	Full-Stack Developer	Since: 21/04/2023	To: 11/07/2023
---------------	--------	----------------------	----------------------	-------------------

- Second Aythen web project in REACTJS.

Functional Experience: I played a vital role in the development of components like modals, pages and custom-hooks also helped in design improvement in some components. In the same way, developed endpoints for functions such as sending emails, manage to consume data in the front-end and maintained these in the global state of REDUX, and also I developed vital functionalities in the web page editor.

Tools: HTML, CSS, JavaScript, React, Express, PostgreSQL, ReduxToolkit
